The AxesNet Game Room Management System

The AxesNet game room management system was designed from the ground up with the game room operator in mind. Its goal is to get you, the operator, the information that you need to run your game room to its full potential. **AxesNet** is fully automated, and doesn't need servers or computers in the game room. The card readers and POS devices report **automatically** to our central system, without your intervention. This gives you a worry **free** system that is always up to date with the most recent reports and statistics. You can access the system from anywhere in the world, simply by loging-in with **any web browser.** You will always have the latest information, in **REAL TIME**, at your fingertips. Need a new report or statistic? No problem. Just give us a call, we'll design it and add it to the interface and next time you log-in, it will be there. No update required on your part, **we do all the work.**

The statistics and reports give you answers to questions like:

  Who are my most active players?

- Which game brings-in the most money?

- How much do I have in my bill acceptors tonight?

- Did the bill acceptor really steal this guy's 20$?

- Who is sitting in my game room right now and how much do they have on their cards?

We have the information to generate **thousands** of reports and statistics to

Answer just about any question you might have. If it's not in the system we'll add it!

Axes Card Reader

With the Axes Card Reader set up is easy, just insert a small sims configuration memory card, hookup a few wires, plug it into your internet service and your ready to manage your game room with a click of a mouse. It is that simple.

Standard Change-Makers Modular Series Front Load Change Machines

Standard Change-Makers, Inc. has been delivering high quality Change, Ticket and Token machines since 1955. Their products are tough, dependable and backed by outstanding service.

Standard Change-Makers introduces the NEW Modular Series Change machine. New models MC100 and MC200 are a big step forward in changer technology. Standard has maintained their high quality, solid-welded Cabinet & Component designs while upgrading the Controller technology. All this in a low cost solution without sacrificing the security and reliability you have come to expect from Standard Change-Makers.

All Modular Series Changers feature the new Smart Hopper Technology that combines rugged steel construction with a new advanced MDB communications Control Board. Machines come pre-programmed with Fast Vend Shut-Off/Auto Reset, which is a popular stringing loss protection feature. These changers are easy to access and service. The Modular Smart Hopper can be tilted and dumped without disconnecting the power, and can be completely removed by disconnecting a few cables. With the direct drive, counter-rotating disc dispense mechanism, there are no chains or belts to replace and no required maintenance.
